

PORTABLE SOLAR POWER SYSTEM

LED solar home lighting system is an off-grid solar generator designed to provide stable and reliable power to homes and communities or areas without or even electricity without access to grid power.

The small solar system is characterized by convenient movement, easy installation, and reliable performance, which is very suitable for situations requiring emergency power.

- It is the ideal, reliable energy source for many applications such as lighting, radios, fans, TVs, computers, refrigerators. The USB port is compatible with all 5V-USB charging devices. It can also be used as a backup power source in emergency situations.

PRODUCT DETAILS

MULTIFUNCTION IN ONE SYSTEM

Strong compatibility

Equipped with three different interfaces: AC, USB, and car charger port, providing AC and DC output in two different voltage modes, which can power multiple devices at the same time.

PRODUCT FEATURES

1 Fast Charging Efficiency

High quality solar panel, 20% of light conversion full charge in about 6-8 hours.

2 Large Capacity Is More Durable

Upgraded high-capacity, 365 days of range with recharge and discharge protection.
